

iTrack

Golf Launch Monitor

Product Datasheet

PRODUCT INTRODUCTION

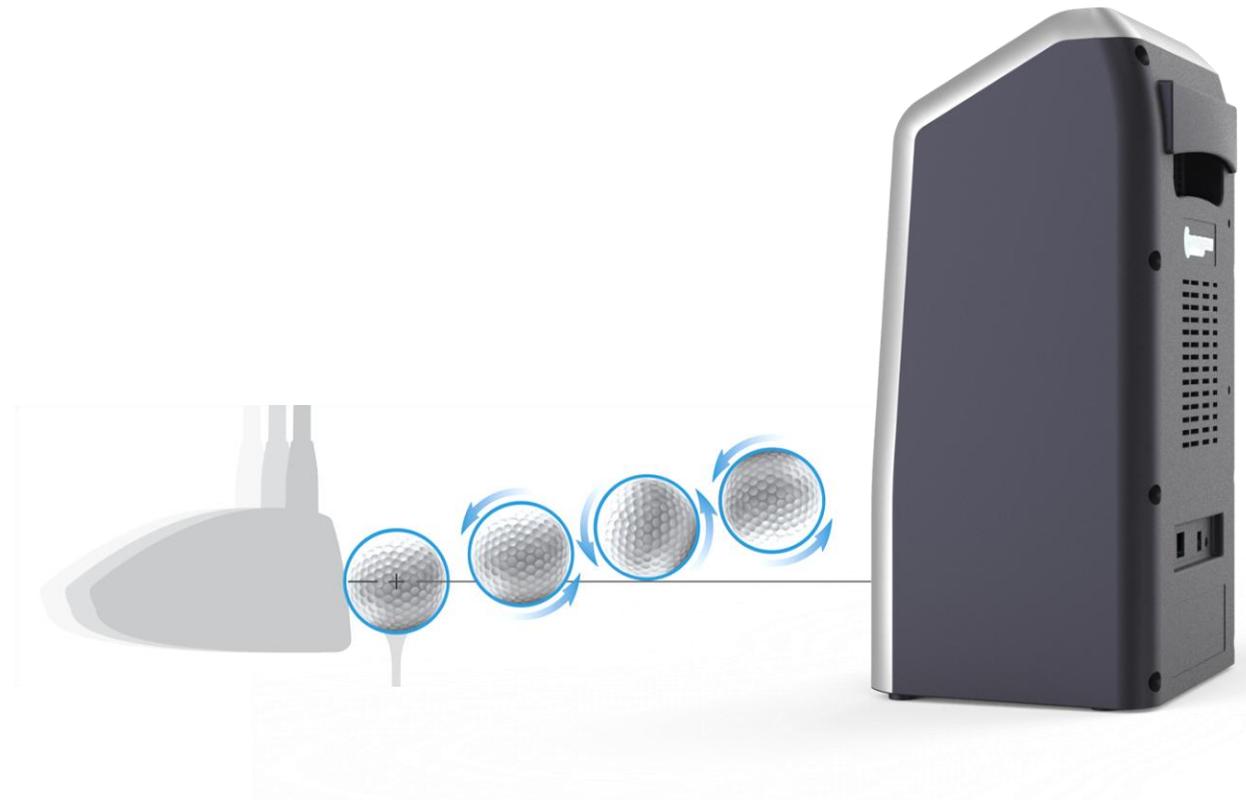

iTrack (Golf Shot Data Analyzer) is a product with completely independent intellectual property rights owned by Shanghai Casevision Technology Co., Ltd.

iTrack captures the flight and club head trajectory of the golf ball through multiple high-speed cameras. Whether indoors or outdoors, it will reliably, accurately and comprehensively calculate the ball's takeoff, spin, flight trajectory, club head face and other data for you.

TYPE OF DATA

BALL DATA	CLUB DATA
SPEED	CLUB HEAD SPEED
CARRY	ATTACK ANGLE
LUNCH	FACE ANGLE
PUSH/PULL	LIE ANGLE
SPIN AXIS	IMPACT LOFT
TOTAL SPIN	CLOSURE RATE
BACKSPIN	EFFICIENCY
SIDESPIN	IMPACT POINT
PEAK HEIGHT	CLUB PATH
OFFLINE	/
LANDING ANGLE	/

Advanced algorithms and powerful computing capabilities provide you with comprehensive, reliable and accurate data.

CHARACTERISTICS

Trajectory view

The advanced algorithm and its powerful computing power can provide you with comprehensive, reliable and accurate 3D flight trajectory curve and take-off data of the ball without connecting any other equipment.

Left and Right hands

Just put the ball in the corresponding detection area, the left and right hand modes are automatically switched, and the correct hitting direction data is given.

HD Touch screen

High-resolution touch screen: The take-off data and 3D ballistic curve and data of the ball are presented to the player at a glance. All data can be seen without any operation during swing, and it will not have any impact on the player's swing rhythm.

Automatic calibration

Target line alignment stick: It is convenient and quick to locate the target line, which is very convenient to use USB/WiFi/Ethernet, rich interfaces, easy to interconnect with other devices.

APPLICATION

Golf range

Golf course

Golf workshop

Indoor golf

PRODUCT SPECIFICATIONS

The logo for iTrack, featuring the word "iTrack" in a bold, blue, sans-serif font. A blue curved line arches over the "i" and "T".

Technical specifications

Product Name: iTrack (Golf Launch Monitor)

Detection area: 30*15cm*2 (left and right)

Size: 200*170*320mm

Weight: 3000g

Battery: Lithium battery that can maintain long-term operation

Interface: Type-C/WiFi/Ethernet
