

# How to connect iTrack and GSPRO

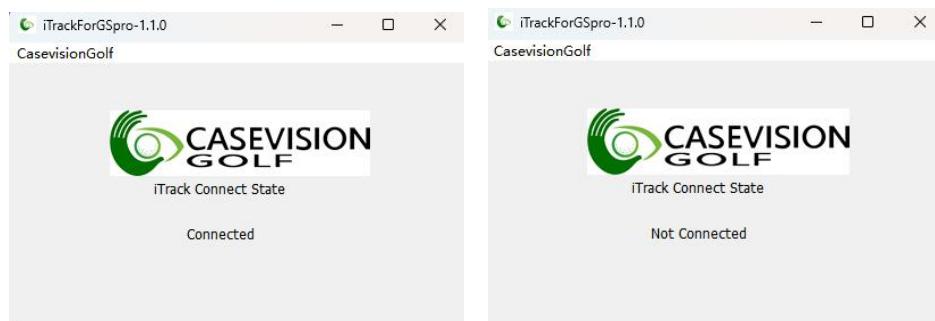

1. Download **iTrackForGspro.exe** from [www.casevisongolf.com](http://www.casevisongolf.com).
2. Turn on iTrack and wait for it to start up. You should then be able to find iTrack's Wi-Fi network in your computer's network connections. Connect your computer to this hotspot. The default password for the iTrack hotspot is 12345678.

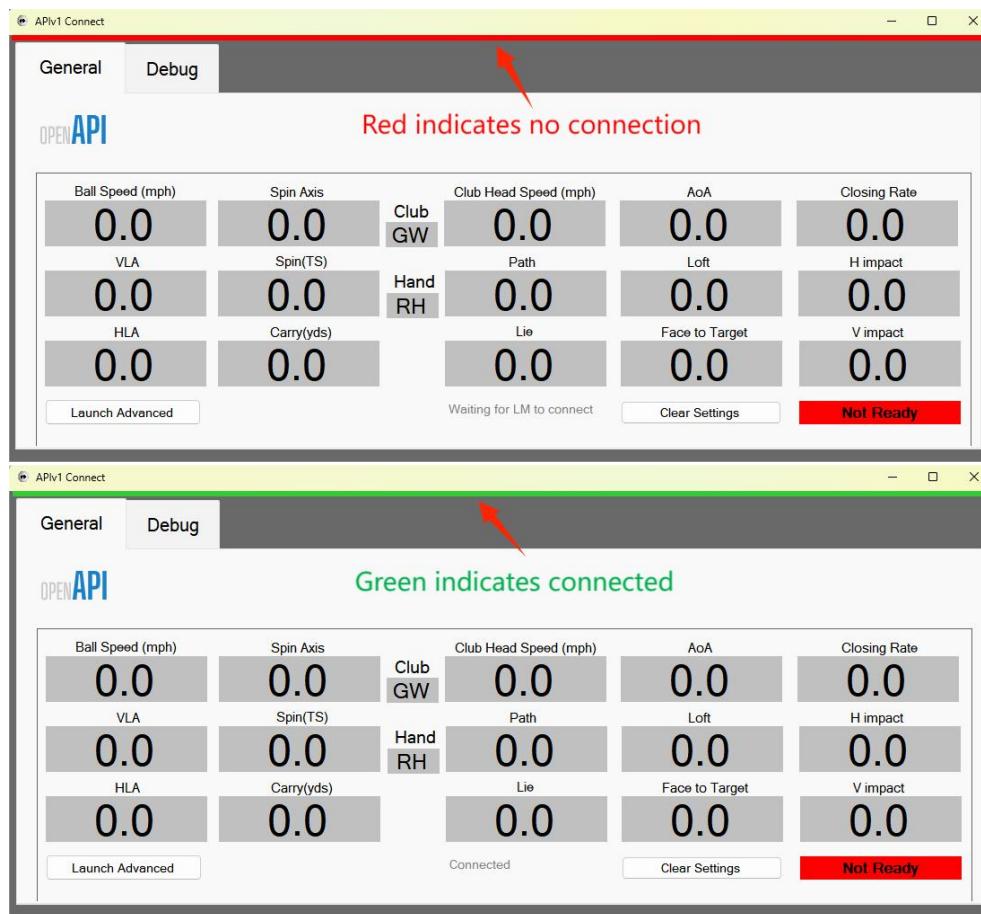

3. Run the **iTrackForGspro.exe** software.

4. iTrackForGSPRO will display "Connected", indicating that the device is connected; if the computer is not connected to iTrack, the window will display "Not Connected", indicating that the device is not connected.

5. Run the GSPRO. A small data window will pop up. You can also know whether it is connected to iTrack by the color bar at the top of the data window.

6. Once you enter the emulator's main interface, you can fully enjoy the amazing features GSPRO offers: LOCAL MATCH, PRACTICE, CHALLENGES, TOURNAMENTS, and ONLINE MATCH.
